DEOXYL

Test Tank Clarifier

Features

Water clarifier

Brass brightener

Liquid super concentrate

Dry powder

100% soluble

Long life

Benefits

Exceptional cleaning ability on copper brass materials

Easy to use - Super concentrate dilutes readily for homogeneous solutions

Economical to use - Excellent shelf life

Manufactured under strict standards

Controlled uniform quality

*** Non-corrosive at recommended concentration**

*** Mild core cleansing**

*** Price quote upon request**

*** Immediate shipment**

*** Conveniently packaged**

Directions:

A. Use Deoxyl to control pH in test tank.

B. 1 lb. dry Deoxyl makes 600 gallons of water at pH of 4.0.

C. Control pH at 4.0-5.0 range for test tank clarity.

D. Control standards by means of easy analytical procedures - pH meter or pH paper.
